

Sanjiv Kumar A

B.Tech — Artificial Intelligence & Machine Learning

INSTITUTION

RMD Engineering College

YEAR

2nd Year, AI & ML Department

CGPA

9.34 / 10

ABOUT ME

I enjoy breaking down complex problems and finding patterns in them — which is what first drew me to AI and Machine Learning. Beyond academics, I challenge myself through competitive exams like the Srinivasa Ramanujan Mathematical Competition and am always picking up new tools and technologies. I believe in learning by building, and I'm looking for opportunities to move from coursework to real, hands-on experience.

PROFILE SUMMARY

A dedicated second-year Artificial Intelligence and Machine Learning student at RMD Engineering College, maintaining a strong academic record with a CGPA of 9.34. Passionate about working in areas that deal with Artificial Intelligence and its real-world applications, with a growing foundation strengthened through certifications in agentic AI systems, soft skills, and mathematical problem-solving. Eager to apply analytical thinking and technical skills to impactful AI-driven projects and research.

CAREER OBJECTIVE

To build a career in the **IT sector working closely with Artificial Intelligence**, while developing a strong foundation on the software development side. Seeking internship and project opportunities to gain hands-on, industry-level exposure in AI model development, data-driven problem solving, and intelligent automation — with a firm commitment to continuous learning and staying current with evolving technologies.

INTERNSHIP FOCUS

Actively seeking internship opportunities that sit at the intersection of **Artificial Intelligence and Software Development**, where I can contribute fresh perspective while learning from real, production-grade systems. I am particularly drawn to roles involving **agentic AI systems, machine learning pipelines, and intelligent automation**, and I bring genuine curiosity, a strong academic foundation, and a willingness to take on challenging, hands-on work. I see an internship not just as an entry

on a resume, but as the first real step toward building a career I care about — and I intend to make the most of every opportunity I'm given.

CERTIFICATIONS & COURSES

- Oracle Agentic AI Certification**
Certification in agentic AI systems and applications — Oracle
- Soft Skill Development**
NPTEL Certification
- Srinivasa Ramanujan Mathematical Competition**
Cleared Level 1, Level 2 and Level 3

ACHIEVEMENTS

Currently building toward my first set of formal achievements — actively preparing for upcoming technical competitions, coding challenges, and AI-focused contests. Having already cleared all three levels of the Srinivasa Ramanujan Mathematical Competition, I'm working to bring that same consistency and effort into new arenas, with the goal of adding recognized accomplishments to this section soon.

EXTRACURRICULAR ACTIVITIES

Actively looking to get involved in **hackathons, ideathons, and paper presentations** to apply classroom learning to real, time-bound challenges and to build the habit of presenting ideas clearly and confidently. I'm in the process of identifying and registering for relevant college and inter-college events, with the aim of gaining hands-on team-based experience and adding tangible outcomes here as I participate.

SKILLS

- Communication
- Leadership
- Teamwork & Collaboration
- Problem Solving
- Analytical Thinking
- Time Management
- Adaptability

AREAS OF INTEREST

- Artificial Intelligence
- Machine Learning
- Agentic AI Systems
- AI Applications & Research

CAREER PLAN

My long-term goal is to establish myself in the **IT sector, working at the intersection of software development and Artificial Intelligence**. I plan to build a strong technical foundation on the software side — strengthening my programming and web development skills alongside my AI/ML coursework — while steadily gaining exposure to real-world AI applications through internships and projects. I intend to keep learning continuously, staying updated with new tools, frameworks, and research in the field, so I can grow into a well-rounded AI/software professional.

CONCLUSION

With a strong academic record, a growing technical skill set across programming and web development, and a clear focus on Artificial Intelligence, I am committed to continuously developing myself both academically and professionally. I look forward to opportunities that let me apply what I've learned, contribute meaningfully to real-world projects, and grow into a capable AI and software professional.
